

Food Safety Fully Label Ready:

How Trelfa Labs Scaled Nutrition Labelling with MenuSano

Case Study

Trelfa Labs

The Challenge

How do you handle complex nutrition labelling when your current software keeps getting more expensive?

That was Trelfa Labs' Challenge

MenuSano

About Trelfa Labs

Trelfa Labs is a microbiology laboratory and food safety consultancy supporting food businesses with testing and expert guidance.

At the core of everything they do is one non-negotiable value: **being a true partner in their clients' quality and food safety programs.**

That means helping teams protect consumers, meet strict standards, and confidently deliver products that are safe, compliant, and ready for market.

The Challenge

Trelfa Labs was facing a specific hurdle: **their previous software was becoming cost prohibitive.**

As demand for nutrition labelling grew, they needed a solution that could support more complex client requests, without rising costs and without service falling behind.

Before MenuSano

Before MenuSano, Trelfa Labs was using **another nutrition analysis software** to handle their nutrition labelling needs.

But over time, it became really expensive, and the service wasn't improving along with the price.

They needed a better option, one that could support their work as client requests grew.

Finding MenuSano

Trelfa Labs found MenuSano **through an internet search.** What stood out most was the **interactive demonstration** of the software, and **the personality of the company.**

It felt like more than just a tool; it **felt like a team they could actually enjoy working with.**

The Solution

Today, Trelfa Labs relies on three core MenuSano features: **nutrition labelling**, **allergen declaration**, and **custom ingredients**.

These tools help them support bigger and more complex nutrition labeling projects as their company, and their clients' requests, continue to grow.

Real Example

One example stands out as to how MenuSano supports Trelfa Labs:

Nutrition Facts	
Valeur nutritive	
Per 1 cup (100 g) pour 1 tasse (100 g)	
Calories 140	% Daily Value*
% valeur quotidienne*	
Fat / Lipides 2.5 g	4 %
Saturated / saturés 0.5 g	10 %
+ Trans / trans 1.5 g	
Carbohydrate / Glucides 27 g	
Fibre / Fibres 2 g	8 %
Sugars / Sucres 6 g	6 %
Protein / Protéines 5 g	
Cholesterol / Cholestérol 0 mg	
Sodium 210 mg	9 %
Potassium 350 mg	11 %
Calcium 10 mg	1 %
Iron / Fer 1 mg	6 %
*5% or less is a little, 15% or more is a lot	
*5% ou moins c'est peu, 15% ou plus c'est beaucoup	

“As we grew, our customers requested bigger and more complex projects related to nutrition labeling. MenuSano was able to adapt, use creativity, grow, and even assist in projects to ensure our company met our client requests.”

Jon Trelfa - President/Lab Director

Since then, Trelfa Labs has been able to take on requests for dual panels, voluntary nutrient declarations, and labels in different languages.

The Result

Since switching to MenuSano, Trelfa Labs has seen one major shift: capability.

They can now deliver what clients are asking for, dual panels, voluntary nutrient declarations, and labels in different languages, and confidently take on bigger, more complex nutrition labelling projects as they grow.

MenuSano is an easy-to-use nutrition and supplement label generator. A cloud-based software that helps businesses in the food industry generate compliant labels. Whether you're a food manufacturer, restaurant, hospital, or in the cannabis business, MenuSano is tailored to meet your needs.
